SEMTU GROUP CELEBRATES ITS 80th ANNIVERSARY!

Founded in 1942, on the initiative of Finnish concrete industry organizations, the procurement company Semtu has, throughout its history, been in the center of concrete construction, both as a supplier and as a specialist. Over the years, Semtu has launched many product groups into the Finnish market, often as a result of the product development work with our customers. For us, the customer is the heart of our operations and good customer service the basis of our foundation. It's time to celebrate Semtu's anniversary, let's have a cup of coffee to celebrate this occasion when we meet!

Lassi Määttä, *Managing Director of Semtu Oy*

THEN AND NOW

NAME 1942-1951 **Sementtivalimokeskus Oy** 1951-1967 **Sementtivalimoiden Tukku Oy** 1967 **Semtu Oy**

SEMTU IN BRIEF

Semtu Oy's office is located in Talma, Sipoo and it mainly serves customers within Finland's borders. Semtu's warehouse facilities have located in Talma almost since the company was founded. Before Semtu, the area facilitated Fredsbacka/Rauhämäki brick factory.

In the past, the Kerava-Porvoo railway branch terminal line used for freight transport, passed through the Semtu property. Between the 1950s and 1980s, Talma premises hosted own steel product workshop, which mainly produced concrete reinforcements.

Today, Talma runs own production in certain products of the **Sem@Flow** product family, but mainly the property is a storage for finished products. Talma's concrete laboratory plays a key role in Semtu's chemical product development and quality

control. Semtu Oy's head office has located in Talma since 1998, before which the office was based in Helsinki in several locations.

Nowadays Semtu Oy employs 20 people, completed by four employees of Semtu's long-term business partner Kuljetus Antti Rasinkangas Oy.

Semtu Group consists of Semtu Oy (Finland), Semtu AS (Estonia) and Semtu SIA (Latvia).

OUR LOGO THROUGH TIMES...

SEM-TU AS - ESTONIA

Semtu AS was registered in Estonia in June 1992 when Semtu Oy and Metallist RE founded the metal work factory Semet in Tallinn, Peterburi street. In the beginning, the company was managed by Finnish Erkki Kaijainen, who was sent by Semtu Oy for a period of 8 months to conduct a concrete additive market research. However, he ended up staying in Estonia for decades.

The factory moved locations several times. In year 2000 the metal business was separated and a new company Semko Eesti OÜ was formed. Semet was then renamed Semtu AS and the main business focus was trading for the concrete industry, the same as the parent company in Finland.

Since 2007, Semtu AS office and 500m² warehouse have been located in Loo near Tallinn. Former Semtu sales engineer Ago Õispuu created the idea to establish a concrete additive factory for Semtu AS. In

2011, Semtu AS started own production of CE-marked Sem®-additives. Nowadays Semtu AS employs 3 persons.

Heli Põldre started as sales secretary in 1997. Today she handles the company's bookkeeping, logistics and administrative matters.

Erik Heinmaa came to Semtu AS in 2006 as temporary summer employee. At the moment he manages the warehouse, Sem®Flow additives production and key customer sales.

Indrek Rohtma joined the company in 2016 as sales engineer. He has background in metal work engineering. He is an active promoter of Semtu products and has arranged several seminars for architects and engineers. Indrek likes sports and has "infected" his colleagues and clients in a positive way.

Tervitused Eestist!

SEM-TU SIA - LATVIA

Semtu SIA is a small, but powerful company with concrete running through its veins.

We are a construction and concrete production raw material wholesaler. Our customers are ready-mix-concrete and prefabricated concrete factories and other companies related to production and use of concrete. Our product range is very extensive.

Semtu SIA is located near the capital of Latvia, Riga, in a little but very beautiful place Piņķi. This is also the base for Semtu SIA product warehouse, from which deliveries to any place in Latvia and Lithuania are quickly organized.

Semtu SIA has been on the Latvian market for already 24 years, and during this period we have grown into a major player in this sector and appreciated by our customers and business partners. We are also a member

of the Latvian Concrete Association. Semtu SIA consists of three people.

Oskars Vigants started in 2019 and he runs our warehouse. With Oskars our stock is in good and professional hands.

Arnolds Japiņš is our power engine, he puts a lot of energy in everything he does; whether it is taking care of orders and purchases or helping Oskars in the warehouse.

Sandis Beitiks started in 2008 as sales assistant and nowadays he manages administrative and financial issues.

But we all three support each other every time someone needs help, which builds our power core.

Sveicieni no Latvijas!

WE ARE SEMTU
